Education

- | | |
|--|-----------------------------------|
| • B.Sc. in Computer Science & Engineering
<i>North Bengal International University</i> | 2022-2025
CGPA 3.71/4.0 |
| • Higher School Certificate
<i>Rajshahi Govt. Model School & College</i> | 2017-2019
GPA 3.92/5.0 |
| • Secondary School Certificate
<i>Ekdala High School</i> | 2017
GPA 4.86/5.0 |

Research Interest

- Artificial Intelligence
- Deep Learning
- Computer Vision
- Medical Image Analysis
- Explainable AI

Research Experience & Publications

- ***Enhancing Multi-Class Satellite Image Classification with MRCL-ELM: A Hybrid Explainable Deep Learning Approach***
Proposed a novel hybrid deep learning model (MRCL-ELM) for satellite image classification, integrating EfficientNetB0, multi-residual CNN, LSTM, and ELM. Achieved 98.33% accuracy on EuroSAT and 98.10% on UC Merced datasets. Enhanced model interpretability using LIME and SHAP, and deployed the system as a real-time web application. [<https://doi.org/10.1007/s00521-026-12192-y>]
- ***An Explainable Approach to Land-Use Classification Using CNN-LSTM and LIME***
Developed a hybrid CNN-LSTM model for satellite-based land-use classification using the EuroSAT dataset, achieving 98.30% accuracy. Applied preprocessing and data augmentation techniques to enhance performance and integrated LIME for model interpretability. [DOI: [10.1109/QPAIN66474.2025.11172239](https://doi.org/10.1109/QPAIN66474.2025.11172239)]
- ***An Adaptive Failure-Aware Deep Learning Framework for Robust Medical Image Segmentation (Thesis)*** 🔗
Developed AFA-Seg, an Adaptive failure-aware CNN-Transformer framework for medical image segmentation with improved robustness and reduced failure rates on CVC-ClinicDB and Kvasir-SEG. Integrated adaptive retraining, ensemble learning, TTA, and XAI for reliable and interpretable performance.

Project

- ***BudgetByte*** [[link](#)]
Built Budget-Bytes, a C2C e-commerce web app for second-hand goods with authentication, listings, transactions, and rating/review features.
- ***Tech_Blog*** [[link](#)]
Developed a responsive Tech Blog platform using HTML5 and CSS3, featuring modular design, categorized content, and interactive UI for improved usability.
- ***Weather App*** [[link](#)]
Weather App (Android) A simple and responsive Android Weather App built using Java and XML, powered by the Open Weather Map API. Get real-time weather data for your current location or any city in the world.

Skills

- **Programming:** Python, C, C++, Java
- **AI & ML:** TensorFlow, PyTorch, Scikit-learn, OpenCV
- **Deep Learning Concepts:** CNN, LSTM, Transformers, Explainable AI, Computer Vision
- **Web & Frameworks:** Flask, Django, Bootstrap
- **Databases:** MySQL, SQLite, JSON
- **Tools & Platforms:** Jupyter Notebook, VS Code, Kaggle, Google Colab

Languages

- English (Fluent)
- Hindi (Fluent)
- Bengali (Native)

Awards

- **Idea Showcasing with Poster Presentation, IEEE ProCon** 20/11/2025
Awarded 2nd Runner-up in the Idea Showcasing with Poster Presentation at the International Professional Activities Congress (ProCon-2025), co-located with IEEE SPICSCON 2025, for outstanding teamwork, critical thinking, and research presentation.
- **Top Scorer Regional Research Olympiad, Rajshahi University Research Society (RURS).** 05/09/2024
Achieved 7th position among 500 participants and recognized as a “Top Scorer” in the RURS Research Olympiad 2024, organized by Rajshahi University Research Society (RURS).

Certificates

- **IEEE Conference Presentation, BAUST, Bangladesh**
Presented a research paper titled “An Explainable Approach to Land-Use Classification Using CNN-LSTM and LIME” at the 2025 IEEE International Conference on Quantum Photonics, Artificial Intelligence, and Networking (QPAIN,2025)
- **IoT Workshop, Science Club, University of Rajshahi**
Participated in a hands-on workshop on “IoT: From Arduino to JRC Board”, in collaboration with FronTech & JRC Board.
- **Higher Study Camp Participation, Science Club, University of Rajshahi**
Participated in “the RUSC Higher Study Camp 2025” focused on academic and research development.
- **Hackerrank Problem Solving Certificate (Basic)**
HackerRank's Basic Problem-Solving track is a set of coding challenges designed to assess and enhance your problem-solving skills and proficiency in programming language.

Volunteer & Leadership

- **Elected Vice President, Computer Society, North Bengal International University** 06/2025-12/2025
led collaborative initiatives and contributed to the development of the university's technology community.
- **Campus Ambassador, FutureNation Work Wave** 01/2025-12/2025
This role gives me the opportunity to bridge students with valuable resources, programs, and career development initiatives. I look forward to learning, growing, and contributing to this amazing journey.
- **Campus Ambassador, BDapps-Bangladeshi National App Store** 01/2024 – 12/2024
Represented BDApps on campus by promoting app development initiatives and national digital programs; organized awareness sessions, workshops, and outreach activities to engage students; supported developer onboarding and encouraged participation in app competitions and innovation challenges.
- **Volunteer & Event Organizer, Bangladesh Hi-Tech Park, Rajshahi** September,2023
Coordinated and executed technology-focused events, seminars, and workshops; managed event logistics, registrations, and participant engagement; collaborated with stakeholders to ensure smooth operations; supported initiatives promoting innovation, entrepreneurship, and ICT development.
